THE EVENT

Indonesia Maritime Expo (IME) is the most anticipated international event in Indonesia. IME 2023 provides the perfect platform for the entire maritime community in Indonesia to discover new technologies, innovations, solutions, conduct business, strengthen existing relationships, and forge new ones. It'll be 3 days of extensive networking, learning, and exploration of business collaboration and opportunities.

Join the entire maritime community in Indonesia at IME 2023.

IME 2023 EVENT HIGHLIGHTS

EXHIBITION

The dedicated maritime exhibition in Indonesia to showcase global maritime solutions, equipment and technologies to create the future of Indonesia's maritime industry.

CONFERENCE

Join industry experts as they exchange top-level discussions on key and trending issues impacting Asia's maritime industry while spotlighting Indonesia.

Open free to all trade visitors

NETWORKING

Connect with Indonesia maritime stakeholders including shipowners, shipyards, ship management, solution providers and end-users at IME.

IME 2023 CONFERENCE PROGRAMME

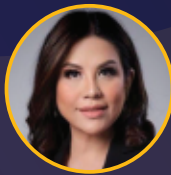

OPEN TO ALL

DAY ONE TUESDAY, 17 OCTOBER 2023

10:45am **OPENING CEREMONY**

The Role of the Maritime Sector in Achieving Indonesia's 2045 Vision

The maritime sector can significantly boost Indonesia's economic growth. To realize its 2045 vision of maritime prosperity, sustainable and inclusive development is crucial. This Keynote focuses on the sector's role in achieving this vision, including its economic advantages, challenges, and collaborative approaches between government and private enterprises. Additionally, it addresses the impact of technology and global cooperation on maritime growth.

CARMELITA HARTOTO
Chairwoman
Indonesian National Shipowners'
Association (INSA)

11:45am **Opportunities Abound: Charting the Course of Indonesia's Maritime Sector in 2024 and Beyond**

Indonesia's economy has been on an upwards trend post-COVID with the government bullish about the maritime sector's contribution to GDP. Plenty of opportunities are waiting to be uncovered for those who are successful in navigating the various operational and regulatory hurdles and barriers to entry.

This session will focus on the identifying these opportunities while taking a closer look at the keys trends in the Indonesian maritime sector in the next few years. It will also look at what it means for both local and overseas players as the sector embarks on its energy transition journey.

IME 2023 CONFERENCE PROGRAMME

OPEN TO ALL

11am

Creating a Sustainable and Green Indonesian Maritime Industry - Is It All Talk and No Bite?

Indonesia's maritime industry is moving towards a more sustainable operational mindset. More emphasis is being put to reduce carbon emissions, with companies beginning to implement a slew of initiatives with the eventual aim of meeting IMO's 2030 & 2050 carbon emission targets. However, the prohibitive costs of financing these new sustainability initiatives, a lack of proper implementation strategy, and a slow adoption of green technology and innovation ensure that major hurdles remain. Will a sustainable and green Indonesian maritime sector be achievable or is it just a pipe dream? This panel will take a closer look at these hurdles and identify suitable technology and innovation to help achieve this ambitious goal.

Developing Indonesia's Next-Gen Maritime Industry - The Push for Digitalization and Innovation

Digitalization, along with innovation, are rapidly being introduced to improve operations while reducing OPEX. They can be used to improve maintenance, lower shipbuilding cost, improve efficiency and reduce manpower requirements. This panel will explore the various digitalization tools and innovation that are available in the market and how best to implement them while balancing investment cost and effectiveness.

IME 2023 CONFERENCE PROGRAMME

OPEN TO ALL

2:30pm Shipbuilding in Indonesia – Revamping through Technology and Innovation

The Indonesian government's plans to develop its maritime infrastructure as resulted in a concerted push to grow and modernise the shipbuilding industry in recent years through the adoption of innovative technology. Major shipyards across the country have expanded their operations and increased their capacity, buoyed by strong demand as well as increased investment. This panel will take a closer look at the various opportunities in Indonesia's shipbuilding sector, identify challenges facing the industry and address pertinent issues such as rising material cost, labour shortage and high financing cost.

4pm Exploring the Use of Alternative Marine Fuels in Indonesia

Ships currently use 300 million tons of fossil fuel a year but with decarbonization efforts moving at an unprecedented pace, there is an increased demand for alternative marine fuels such as Methanol, Ammonia, LNG & Hydrogen. This panel will discuss the availability of such fuels in Indonesia and understand the advantages and disadvantages of each. It will also identify barriers to adoption of alternative marine fuels which includes cost, equipment & existing infrastructure.

IME 2023 CONFERENCE PROGRAMME

OPEN TO ALL

DAY THREE THURSDAY, 19 OCTOBER 2023

11am **Accelerating Green & Smart Ports and Terminals Development in Indonesia**

The Indonesian government plans to develop more than 100 smart and green ports in the near future, up from just 14 in 2022. This will greatly improve the country's entire maritime infrastructure and will open more opportunities for investors from around the region. This panel draws an overview of the existing green and smart port developments in Indonesia, the benefits of these port developments and how they are creating an abundance of opportunities for investors. It will also investigate how to incorporate innovative technologies such as machine learning and AI to improve business processes while also adhering to new sustainable guidelines.

1pm **Addressing Legal Disputes in the Indonesian Maritime Industry**

From cargo contamination, chartering disputes and vessel collisions, legal disputes are common in the maritime sector, which is often complex and highly regulated. With vessel traffic and cargo volumes slowly getting back to normal post-COVID, it is imperative for shipowners and maritime professionals operating in Indonesia to understand the local laws, their rights and know the type of legal recourse available them. Join us as we explore the most common types of legal disputes that arise from the Indonesian maritime sector, as well as best practices for preventing and solving them.

IME 2023 CONFERENCE PROGRAMME

OPEN TO ALL

1:45pm **Maritime Security, Its Challenges and How We Overcome Them**

The maritime security climate has changed drastically over the years. Piracy attacks attempt around the world has decreased but the threat still exists. Join SecuriState as they take a look at the various piracy attacks in the region including those unreported incidents, the current security climate and the awareness and also how to safeguard vessels through the use of technology.

RON MALARAVAN

Director
SecuriState

2:30pm **Optimizing the Digital Transformation of Indonesia's Maritime Logistics Sector**

Digitalisation in the Indonesian maritime logistics sector is rapidly gathering pace. The transition towards digitisation and automation is speeding up, particularly in the last couple of years, to drive competitiveness and enhance operational efficiency. However, barriers remain and there are many challenges still to overcome. With that said, there are also plenty of opportunities available as the Indonesia's maritime logistic sector continues its push towards digitalization. This panel will discuss how best to implement digital tools that will increase efficiency while improving port connectivity in Indonesia's maritime logistic sector.
